G-series for Avid® Artist Series

Configure your G22 for Avid® Artist Series
online at www.ArgosyConsole.com

G-Series begins with studio presence - sleek, individual, and seductive. Engineered from experience - years of producing technical furniture for highly sensitive environments.

The differences are immediate and profound. Distinctive styling and build quality are industry shaping and head turning. Sculptured lines of the G-Series enable unobstructed line-of-sight and line-of-sound while putting every essential control at your fingertips. Elevated chassis provides transparency to low frequencies, while the pitched surface and perforated grills intentionally foil early sound reflection and defeat build-up of standing waves.

G-series standard or optional adjustable height leg system and steel rails support 19-32mm powder coated Medite® and 13-ply baltic birch components. G-Series provides unparalleled support of your studios most vital equipment.

Once you seat yourself at the controls, you'll realize G-Series is the console you've always wanted.
